To Whom It May Concern:

We are looking at doing a Humate project near Thompson, UT. Provided that the material and analysis meet our specifications, we would anticipate a production of 3,000 tons before the end of year 1999. Also an additional 50,000 tons to follow in the next year, beginning in February. Production may increase to 100,000 tons per year by the end of next year.

Sincerely,

Steve Young
